

Series 115 Data Sheet Rotary Trimmer

Industrial 19mm Diamete 2 Watt Wirdwound Rotary Trinmer

Features

- Fully enclosed construction
- Four mounting styles
- Long rotational life
- Optional grounded or insulate rotor construction
- · Incorporated fixed resistor available
- · Available with nylon shaft
- RoHS compliant

Electrical and Mechanical Spuncations

Resistance Range

1 ohm through 20K ohms (linear taper)

Resistance Tolerance $\pm 20\%$, $\pm 10\%$, $\pm 5\%$

Power Rating, Watts

2 watts @ 55°C derated to no load @ 105°C, mounted on steel panel 1.5 watts @ 55°C derated to no load @ 105°C, mounted on bakelite panel

Voltage Rating

Terminals to case (insulated types only) High pot test, one minute — 900 VAC Operating maximum — 500 VDC Across end terminals

Determined by resistance value and wattage rating

Resistance Taper

Standard: Linear taper

Incorporated Fixed Resistor

A fixed resistor can be incorporated in the Series 115 at the end of CW or CCW rotation to a minimum of 15% of the total resistance value. The rotation is shortened by an amount proportional to the ratio of the fixed resistor to the total resistance value.

Rotational Angle

Total Rotation: 270° ± 5°

Rotational Torque

1/2 to 10 in-oz. (36 - 720 gf-cm)

Resistor Adjustment

Standard: Cross slot provided in rotor for screwdriver adjustment.

Special: Molded nylon, screwdriver-slotted shafts which are integral with rotor are available in many lengths in increments of 1/8" (3.2mm) up to a maximum of 2" (50.8mm) as required.

Mounting Types Available

| Printed circuit mounted: | Type 115 P |
|--------------------------|------------|
| Twist tab mounted: | Type 115 T |
| Snap-in mounted: | Type 116 E |
| Rivet ear mounted: | Type 117 R |

Terminal Information

- Grounded Construction The grounded construction is supplied without a center terminal and the contactor is connected to the case. This construction can be furnished with one end terminal at either end of the resistance element or with terminals at both ends of the element.
- Insulated Construction The contactor is insulated from the base and connected to the center terminal on the insulated construction. This construction can be supplied with the center terminal and one end terminal at either end of the resistance element or with the center terminal and terminals at both ends of the resistance element.

Stop Strength

4 in-lb. (4.6 Kgf- cm)
